

SALEE PRINTING PUBLIC COMPANY LIMITED

FINANCIAL STATEMENTS

31 DECEMBER 2021

Independent Auditor's Report

To the Shareholders and the Board of Directors of Salee Printing Public Company Limited

My opinion

In my opinion, the financial statements present fairly, in all material respects, the financial position of Salee Printing Public Company Limited (the Company) as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRS).

What I have audited

The Company's financial statements comprise:

- the statements of financial position as at 31 December 2021;
- the statements of comprehensive income for the year then ended;
- the statements of changes in equity for the year then ended;
- the statements of cash flows for the year then ended; and
- the notes to the financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of my report. I am independent of the Company in accordance with the Code of Ethics for Professional Accountants issued by the Federation of Accounting Professions that are relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key audit matters

Key audit matters are those matters that, in my professional judgement, were of most a significance in my audit of the financial statements of the current year. I determine one key audit matter: allowance on decrease in cost of inventory to net realisable value. The matter was addressed in the context of my audit of the financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on this matter.

Key audit matter	How my audit addressed the key audit matter
<p>Allowance on decrease in cost of inventory to net realisable value</p> <p>Refer to Note 7 a) 'Critical accounting estimates and judgements related to allowance on decrease in cost of inventory to net realisable value' and Note 12 'Inventories, net'.</p> <p>As at 31 December 2021, the Company has a Baht 116.89 million outstanding balance of inventory before recognising the Baht 21.79 million allowance to decrease its cost to the net realisable value in the financial statements. Inventories, net represents 9.87% of total assets.</p> <p>The measurement criteria of the allowance is assessed based on 1) slow-moving inventory, 2) obsolete inventory, and 3) selling price of inventory lower than cost. Management used their judgement and experience in recording these estimates and included this information: 1) inventory that hasn't moved for a long time is considered in the allowance for slow-moving inventory, 2) obsolete inventory is a fully recorded allowance, and 3) the allowance was calculated from the variance in the selling price (net with costs to sell) and the cost of inventory at the year-end date to consider the allowance for the selling price of inventory lower than cost.</p> <p>I focussed on this area because the amount of inventory is material to the Company's total assets. Also, this allowance relies on management's judgement and experience. Therefore, the appropriateness of the inventories valuation also depends on management's judgement and related information.</p>	<p>My audit procedures included:</p> <ul style="list-style-type: none"> • obtaining an understanding of the accounting policy, evaluating the management's method used to develop this allowance and determining if the accounting policy is consistent with prior years • assessing the appropriateness of the management's criteria in developing this allowance by considering historical data and the key inventory ratio analysis • testing the reliability of the inventory aging analysis report by tracing the accuracy of inventory aging to their supporting documents • testing the accuracy of the net realisable value from the selling price (net with costs to sell) at the year-end date using the latest price quotations, and calculating the allowance based on the management's criteria and • assessing whether any slow-moving or obsolete inventories were omitted from the detailed analysis by comparing the long outstanding items in the inventory aging analysis and tracing information obtained while observing inventory counts at the year-end date. <p>From performing the above procedures, I determined that the management's criteria used to estimate the allowance on the decrease in cost of inventory to the net realisable value was reasonable based on the supporting evidence.</p>

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to the audit committee.

Responsibilities of the directors for the financial statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with TFRS, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the audit committee with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, I determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1 General information

Salee Printing Public Company Limited (the Company) is a public company limited and listed on the Stock Exchange of Thailand. The Company is incorporated and domiciled in Thailand. The address of the Company's registered office is as follows:

No. 19 Moo 10, Tumbol Klong Si, Amphur Klong Luang, Pathumthani 12120.

The principal business operation of the Company is label printing for products.

The financial statement was authorised for issue by the Board of Directors on 24 February 2022.

2 Significant events during the current year

Coronavirus Disease 2019 outbreak

The outbreak of Coronavirus Disease 2019 ("COVID-19") in 2021 has no significant adverse impacts on the Company's operating results for the year ended 31 December 2021. According to the consumption is still continues, it will result to the ordering of label printing for products.

However, COVID-19 pandemic and preventives measure still exist, which the Company's management pays special attention to COVID-19 pandemic and assessing the effect to operating including planning to encounter such situation by continuously monitor the progress of the situation and assess the impact that may occur on the Company's operating results.

3 Basis of preparation

The financial statements have been prepared in accordance with Thai Financial Reporting Standards (TFRS) and the financial reporting requirements issued under the Securities and Exchange Act.

The financial statements have been prepared under the historical cost convention except disclosed as others in the accounting policy.

The preparation of financial statements in conformity with TFRS requires management to use certain critical accounting estimates and to exercise its judgement in applying the accounting policies. The areas involving a higher degree of judgement or complexity, or areas that are more likely to be materially adjusted due to changes in estimates and assumptions are disclosed in Note 7.

An English language version of the financial statements have been prepared from the statutory financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

4 New and amended financial reporting standards

4.1 New and amended financial reporting standards that are effective for accounting period beginning on or after 1 January 2021 and have no significant impacts to the Company

- a) **Revised Conceptual Framework for Financial Reporting** added the following key principals and guidance:

The new financial standards related to financial instruments are as follows:

- Measurement basis, including factors in considering difference measurement basis
- Presentation and disclosure, including classification of income and expenses in other comprehensive income
- Definition of a reporting entity, which maybe a legal entity, or a portion of an entity
- Derecognition of assets and liabilities

The amendment also includes the revision to the definition of an asset and liability in the financial statements, and clarification to the prominence of stewardship in the objective of financial reporting.

- b) **Amendment to TFRS 9, Financial instruments and TFRS 7, Financial instruments: disclosures** amended to provide relief from applying specific hedge accounting requirements to the uncertainty arising from interest rate benchmark reform such as IBOR. The amendment also requires disclosure of hedging relationships directly affected by the uncertainty.
- c) **Amendment to TAS 1, Presentation of financial statements and TAS 8, Accounting policies, changes in accounting estimates and errors** amended to definition of materiality. The amendment allows for a consistent definition of materiality throughout the Thai Financial Reporting Standards and the Conceptual Framework for Financial Reporting. It also clarified when information is material and incorporates some of the guidance in TAS 1.
- d) **Amendment to TFRS 16, Leases** amended to provide a practical expedient where lessees are exempted from having to consider individual lease contracts to determine whether rent concessions occurring as a direct consequence of the COVID-19 pandemic are lease modifications. It applies to rent concessions that reduce the lease payments due by 30 June 2022.

4.2 Amended financial reporting standards that are effective for accounting period beginning or after 1 January 2022 and have no significant impacts to the Company

The Company has not early adopted the amended TFRSs which have been issued and not mandatory for the current reporting period.

- a) **Interest rate benchmark (IBOR) reform - phase 2, amendments to TFRS 9, TFRS 7, TFRS 16 and TFRS 4** provide relief measures addressing issues that might affect financial reporting during the reform, including the effects of changes to contractual cash flows or hedging relationship arising from the replacement of one benchmark with an alternative benchmark.

Key relief measures of the phase 2 amendments are as follows:

- When changing the basis for determining contractual cash flows for financial assets and financial liabilities (including lease liabilities), changes that are necessary as a direct result of the IBOR reform and which are considered economically equivalent, will not result in an immediate gain or loss in the income statement. TFRS 16 has also been amended to require lessees to use a similar practical expedient when accounting for lease modifications that change the basis for determining future lease payments as a result of the IBOR reform.
- Hedge accounting relief measures will allow most TFRS 9 hedge relationships that are directly affected by the IBOR reform to continue. However, additional ineffectiveness might need to be recorded.

TFRS 7 requires additional disclosure about:

- the nature and extent of risks arising from the IBOR reform to which the entity is exposed to
- how the entity manages those risks
- the progress in transitioning from the IBOR to alternative benchmark rates and how the entity is managing this transition.

5 Accounting policies

5.1 Foreign currency translation

- a) **Functional and presentation currency**

The financial statements are presented in Thai Baht, which is the Company's functional and presentation currency.

- b) **Transactions and balances**

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

5.2 Cash and cash equivalents

Cash and cash equivalents consist of cash in hand and at banks, and all highly liquid short-term investments with an original maturity of three months or less and not subject to withdrawal restrictions.

5.3 Trade accounts receivable

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business.

Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, they are recognised at fair value. The Company holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost.

The impairment of trade receivables has been disclosed in Note 5.5 e).

5.4 Inventories

Inventories are stated at the lower of cost and net realisable value.

Cost of inventories is determined by the weighted average method. Cost of raw materials comprise all purchase cost and costs directly attributable to the acquisition of the inventory less all attributable discounts. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and directly attributable costs in bringing the inventories to their present location and condition.

5.5 Financial assets

a) Classification

The Company classifies its debt instrument financial assets in the following measurement categories depending on a) business model for managing the asset and b) the cash flow characteristics of the asset whether they represent solely payments of principal and interest (SPPI).

- those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- those to be measured at amortised cost.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

b) Recognition and derecognition

Regular way purchases, acquires and sales of financial assets are recognised on trade-date, the date on which the Company commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

c) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether the cash flows are solely payment of principal and interest.

d) Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the financial assets. The measurement debt instruments by amortised cost: Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in other income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as a separate line item in the statement of comprehensive income.

e) Impairment

The Company applies the TFRS 9 simplified approach in measuring the impairment of trade receivables which applies lifetime expected credit loss, from initial recognition, for all trade receivables.

To measure the expected credit losses, trade receivables has been grouped based on shared credit risk characteristics and the days past due. The contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Company's management has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets. The expected credit loss rates are based on payment profiles, historical credit losses as well as forward-looking information and factors that may affect the ability of the customers to settle the outstanding balances.

The expected loss rates are based on the payment profiles of sales over a period of 36 months before 1 January 2021 and the corresponding historical credit losses experienced within this period.

For other financial assets carried at amortised cost, the Company applies TFRS 9 general approach in measuring the impairment of those financial assets. Under the general approach, the 12-month or the lifetime expected credit loss is applied depending on whether there has been a significant increase in credit risk and recognised expected credit loss since the initial recognition.

The significant increase in credit risk assessment is performed every end of reporting period by comparing expected risk of default as of the reporting date and estimated risk of default on the date of initial recognition.

The Company assesses expected credit loss by taking into consideration forward-looking information and past experiences. The expected credit loss is a probability-weighted estimate of credit losses (probability-weighted present value of estimated cash shortfall). The cash shortfall is the difference between all contractual cash flows that are due to the Company and all cash flows expected to receive, discounted at the original effective interest rate.

When measuring expected credit losses, the Company reflects the following:

- probability-weighted estimated uncollectible amounts
- time value of money; and
- supportable and reasonable information as of the reporting date about past experience, current conditions and forecasts of future situations.

Impairment and reversal of impairment losses are recognised in profit or loss and included in administrative expenses.

5.6 Building and equipment

All building and equipment are stated at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the item will flow to the Company. The carrying amount of the replaced part is derecognised.

All other repairs and maintenance are charged to profit or loss when incurred.

Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

Utility system and building improvement	5 years and 10 years
Machinery and equipment	5 years, 10 years and 15 years
Office equipment	3 years and 5 years
Vehicles	5 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Gains or losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in other gains or losses.

5.7 Intangible assets

Computer software

The cost of computer software development recognises as intangible assets and amortised by straight-line method based on the Company's policy which are 3 years and 5 years.

5.8 Leases

Leases - where the Company is the lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Company. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Contracts may contain both lease and non-lease components. The Company allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the Company is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

The Company is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis.

5.9 Lease liabilities

a) Classification

Financial instruments issued by the Company are classified as either financial liabilities or equity securities by considering contractual obligations.

- Where the Company has an unconditional contractual obligation to deliver cash or another financial asset to another entity, it is considered a financial liability unless there is a predetermined or possible settlement for a fixed amount of cash in exchange of a fixed number of the Company's own equity instruments.
- Where the Company has no contractual obligation or has an unconditional right to avoid delivering cash or another financial asset in settlement of the obligation, it is considered an equity instrument.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

b) Measurement

Financial liabilities are initially recognised at fair value and are subsequently measured at amortised cost.

c) Derecognition and modification

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled, or expired.

Where the terms of a financial liability are renegotiated/modified, the Company assesses whether the renegotiation / modification results in the derecognition of that financial liability. Where the modification results in an extinguishment, the new financial liability is recognised based on fair value of its obligation. The remaining carrying amount of financial liability is derecognised. The difference as well as proceed paid is recognised as other gains/(losses) in profit or loss.

Where the modification does not result in the derecognition of the financial liability, the carrying amount of the financial liability is recalculated as the present value of the renegotiated / modified contractual cash flows discounted at its original effective interest rate. The difference is recognised in other gains/(losses) in profit or loss.

5.10 Impairment of assets

Assets that have an definite useful life are subject to amortisation are reviewed for impairment whenever there is an indication of impairment. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use.

Where the reasons for previously recognised impairments no longer exist, the impairment losses on the assets concerned other than goodwill is reversed.

5.11 Employee benefits

a) Short-term employee benefits

Liabilities for short-term employee benefits that are expected to be settled wholly within 12 months after the end of the period are recognised in respect of employees' service up to the end of the reporting period. They are measured at the amount expected to be paid.

b) Retirement benefits

Amount of retirement benefits is defined by the agreed benefits the employees will receive after the completion of employment. It usually depends on factors such as age, years of service and an employee's latest compensation at retirement.

The defined benefit obligation is calculated annually by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using market yield of government bonds that matches the terms and currency of the expected cash outflows.

Remeasurement gains and losses are recognised directly to other comprehensive income in the period in which they arise. They are included in retained earnings in the statements of changes in equity.

Past-service costs are recognised immediately in profit or loss.

c) Contribution plan

The Company pays contributions to a separate fund on a voluntary. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due.

5.12 Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation. The increase in the provision due to passage of time is recognised as interest expense.

5.13 Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in the statement of comprehensive income, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current tax

The current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax

Deferred income tax is recognised on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not recognised for temporary differences arise from:

- initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit or loss is not recognised
- investments in subsidiaries, associates and joint arrangements where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax is measured using tax rates of the period in which temporary difference is expected to be reversed, based on tax rates and laws that have been enacted or substantially enacted by the end of the reporting period.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

5.14 Revenue recognition

Sales of goods

Revenue from the sale of goods is recognised when control of the products has transferred, being when the products are delivered. Revenue comprises the fair value of the consideration received or receivable for the sale of goods net of returns, discounts, and output tax.

Interest income

Interest income is recognised on a time proportion basis, taking account of the principal outstanding and the effective rate over the period to maturity, when it is determined that such income will accrue to the Company.

Other income

Other income is recognised on an accrual basis.

5.15 Dividend distribution

Dividend distributed to the Company's shareholders is recognised as a liability when interim dividends are approved by the Board of Directors, and when the annual dividends are approved by the shareholders.

5.16 Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the chief executive officer that makes strategic decisions.

6 Financial risk management

6.1 Financial risk

The Company exposes to a variety of financial risk: market risk (including fair value interest risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

Financial risk management is carried out by treasury management. The framework parameters are approved by the Board of Directors and uses as the key communication and control tools for Treasury team internally.

6.1.1 Market risk

a) Cash flow and fair value interest rate risk

The Company's income and operating cash flows are substantially independent of changes in market interest rates. The Company is exposed to interest rate risk relates primarily to its deposits at financial institutions. Most of the Company's financial assets and liabilities bear fixed interest rates which are close to the market rate. The Company assesses that the interest rate risk is insignificant as the interests from financial assets and financial liabilities are not significantly different.

b) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities, and the ability to close out market positions. Due to the dynamic nature of the underlying business, the Company Treasury aims at maintaining flexibility in funding by keeping committed credit lines available.

6.1.2 Credit risk

Credit risk arises from cash and cash equivalents, contractual cash flows of debt investments carried at amortised cost.

The Company has no significant concentrations of credit risk. The Company has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history. Cash deposits are limited to high credit quality financial institutions.

Impairment of financial assets

The Company has 6 types of financial assets that are subject to the expected credit loss model:

- Cash and cash equivalents
- Short-term investment -fixed deposits at banks
- Trade and other receivables
- Restricted deposits at bank
- Long-term investment - fixed deposit at a bank; and
- Financial assets measured at amortised cost

6.2 Capital management

The objectives when managing capital are to:

- Safeguard their ability to continue as a going concern, to provide returns for shareholders and benefits for other stakeholders, and
- Maintain an optimal capital structure to reduce the cost of capital

In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with other in the industry, the Company monitors capital based on the basic of the following gearing ratio.

6.3 Fair value measurement

Fair values are categorised into hierarchy based on inputs used as follows:

Level 1: The fair value of financial instruments is based on the current bid price in active markets for identical assets and liabilities.

Level 2: The fair value of financial instruments is determined using significant observable inputs and, as little as possible, entity-specific estimates.

Level 3: The fair value of financial instruments is not based on observable market data.

The fair value measurement of financial assets and financial liabilities is in accordance with the accounting policies disclosed in Note 5.5 and Note 5.9.

7 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

a) Allowance on decrease in cost of inventory to net realisable value

In determining an allowance on decrease in cost of inventory to net realisable value, the management needs to make judgement and estimates for slow-moving and obsolete inventory based upon, among other things, the product life cycle, the competitive environment, economic circumstances and the situation within the industry.

b) Deferred tax assets

Deferred tax assets are recognised for deductible temporary differences and unused tax losses to the extent that it is probable that taxable profit will be available against which the temporary differences and losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of estimate future taxable profits.

c) Impairment of financial assets

The loss allowances for financial assets are based on assumptions about default risk and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs used in the impairment calculation, based on the Company's past history and existing market conditions, as well as forward-looking estimates at the end of each reporting period.

d) Defined retirement benefit obligations

The present value of the retirement benefit obligations depends on a number of assumptions. Key assumptions used and impacts from possible changes in key assumptions are disclosed in Note 18.

e) Determination of discount rate applied to lease

The Company determines the incremental borrowing rate as follows:

- Where possible, use recent third-party financing received by the individual lessee as a starting point, adjusting to reflect changes in its financing conditions.
- Make adjustments specific to the lease, e.g. term, country, currency and security.

8 Segment and revenue information

The Company is principally engaged in the label printing segment and operate in Thailand. Segment is operated in the main geographical area in Thailand. Segment performance is measured based on operating profit or loss, on a basis consistent with that used to measure operating profit or loss as presented in the financial statements. As a result, all the revenues, operating profit and assets presented in the financial statements represent reportable operating segment. The Company recognised revenue at a point in time.

Geographical information

	2021 Thousand Baht	2020 Thousand Baht
Revenue from customers by customer's location:		
Thailand	423,303	394,852
Myanmar	19,007	15,004
Others	3,461	1,335
Total	445,771	411,191

Key customers information

In 2021, the Company has the revenue from one key customer who is same as customer in prior year amounting to Baht 109 million (2020: amounting to Baht 111 million).

9 Cash and cash equivalents

	2021 Thousand Baht	2020 Thousand Baht
Cash on hand	26	126
Bank deposits - Saving accounts	33,167	34,063
- Current accounts	4,532	154,162
	37,725	188,351

As at 31 December 2021, bank deposits in saving accounts carrying interests rate at 0.05% to 0.35% per annum (2020: 0.10% to 0.55% per annum).

10 Investments in fixed deposits at banks

- As at 31 December 2021, short-term investment is 9 months fixed deposit at Baht 100 million (2020: Baht 100 million) at a local bank carrying interests rate at 0.55 % per annum and due within August 2022 (2020: 0.65% per annum).
- As at 31 December 2021, long-term investment is 24 months fixed deposit at Baht 100 million (2020: Baht 100 million) at a local bank carrying interests between 0.45% to 0.55% per annum and due within October 2022 (2020: 0.45% to 0.50% per annum).

11 Trade and other receivables, net

11.1 Trade and other receivables, net

	2021 Thousand Baht	2020 Thousand Baht
Trade receivables - third parties	128,643	98,302
<u>Less</u> Expected credit loss allowance	(442)	(756)
Trade receivables - third parties, net	128,201	97,546
Trade receivables - related parties	324	203
Other receivables - third parties	92	56
Accrued revenue	992	1,112
Prepayments	1,366	955
	130,975	99,872

11.2 Impairments of trade receivables

The loss allowance for trade receivables was determined as follows:

As of 31 December 2021	Not yet due Thousand Baht	Up to 3 months Thousand Baht	3 - 6 months Thousand Baht	6 - 12 months Thousand Baht	More than 12 months Thousand Baht	Total Thousand Baht
Gross carrying amount - trade receivables	107,941	20,176	161	174	191	128,643
Loss allowance	(34)	(65)	(17)	(135)	(191)	(442)

As of 31 December 2020	Not yet due Thousand Baht	Up to 3 months Thousand Baht	3 - 6 months Thousand Baht	6 - 12 months Thousand Baht	More than 12 months Thousand Baht	Total Thousand Baht
Gross carrying amount - trade receivables	77,384	19,751	203	416	548	98,302
Loss allowance	-	-	-	(208)	(548)	(756)

The reconciliations of loss allowance for trade receivables for the years ended 31 December are as follow:

	Trade receivables	
	2021	2020
	Thousand Baht	Thousand Baht
As of 1 January	756	508
(Reversal of) Expected credit loss allowance recognised in profit or loss during the year	(314)	248
As of 31 December	442	756

12 Inventories, net

	2021	2020
	Thousand Baht	Thousand Baht
Raw materials	55,545	24,395
Finished goods	61,346	57,517
	116,891	81,912
<u>Less</u> Allowance on decrease in cost of inventory to net realizable value		
- Raw materials	(3,118)	(2,422)
- Finished goods	(18,668)	(21,933)
	95,105	57,557

During the years ended 31 December, amounts recognised as cost of sales in profit or loss are as follows:

	2021	2020
	Thousand Baht	Thousand Baht
Cost of sales and cost of services	379,845	343,947
Written-down of inventories to net realisable value	12,846	11,552
Reversal of written-down inventories to net realisable value	(15,415)	(16,278)

The Company sold inventories that were previously written-down to a customer at original cost. Therefore, the Company reversed the allowance for net realisable value in the current year.

13 Financial assets measured at amortised cost

Movements of financial assets measured at amortised cost for the year ended 31 December 2021 are as follows:

	Thousand Baht
Current portion	
Opening net book amount	-
Receive transfer from current portion	19,973
Closing net book amount	19,973
Non-current portion	
Opening net book amount	79,989
Addition during the year	20
Transfer to current portion	(19,973)
Closing net book amount	60,036

The fair values of held-to-maturity have been defined in fair value level 2 which are determined by using available observable market rate, and by discounting all future cash flows using the relevant market rate at the statement of financial position date. The fair values of held-to-maturity presented in the statement of financial position are closed to book values because the effect of discounting rate is not significant.

There is no transferring between fair value hierarchy levels during the current year.

	44,191	35,264

18 Lease liabilities, net

Maturity of finance lease liabilities are as follows:

	2021 Thousand Baht	2020 Thousand Baht
Minimum finance lease liabilities payments		
Not later than one year	23,616	23,664
Later than 1 year but not later than 5 years	37,740	61,328
<u>Less</u> Future finance charges on finance leases	(3,464)	(6,537)
Present value of finance lease liabilities	57,893	78,455
Present value of finance lease liabilities		
Not later than one year	21,475	20,563
Later than 1 year but not later than 5 years	36,418	57,892
Present value of finance lease liabilities	57,893	78,455

19 Employee benefit obligations

	2021 Thousand Baht	2020 Thousand Baht
Statement of financial position		
Employee benefit obligations	9,116	7,909
Statement of comprehensive income		
Employee benefits expenses	1,467	1,234
Statement of other comprehensive income		
Actuarial (gain) loss	(87)	1,404

The movements in the defined benefit obligation for the years are as follows:

	2021 Thousand Baht	2020 Thousand Baht
At 1 January	7,909	5,271
Addition during the year:		
- Current service cost	1,382	1,151
- Interest expense	85	83
Remeasurement:		
- (Gain) Loss from change in actuarial assumptions	(87)	1,404
Benefit payment	(173)	
At 31 December	9,116	7,909

The significant actuarial assumptions used were as follows:

	2021 %	2020 %
Discount rate	1.63	1.07
Inflation rate	4.00	4.00
Turnover rate	5.00 - 25.00	5.00 - 25.00

Sensitivity analysis for each significant assumption used is as follows:

	Impact on defined benefit obligation		
	Change in assumption %	Increase in assumption Thousand Baht	Decrease in assumption Thousand Baht
Discount rate	0.50	(366)	389
Inflation rate	0.50	353	(337)
Turnover rate	10.00	(655)	744

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method has been applied as when calculating the retirement benefits recognised in the statement of financial position.

Salee Printing Public Company Limited
Notes to the Financial Statements
For the year ended 31 December 2021

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

The weighted average duration of the defined benefit obligation is 9.97 years (2020: 11.01 years).

The analysis of the maturity of the payment of retirement benefits without discount rates:

	Within 1 year Thousand Baht	Between 1 - 5 years Thousand Baht	Between 5 - 10 years Thousand Baht	Over 10 years Thousand Baht	Total Thousand Baht
At 31 December 2021 Retirement benefits	486	4,410	7,576	11,752	24,224
At 31 December 2020 Retirement benefits	413	3,439	6,247	12,232	22,331

20 Expenses by nature

	2021 Thousand Baht	2020 Thousand Baht
Salary, wages, and other employee benefits	97,612	89,655
Depreciation and amortization	70,886	69,227
Utility expenses	19,990	17,470
Raw material and consumables used	269,466	224,883
Changes in finished goods	(3,829)	4,318

21 Income tax

	2021 Baht	2020 Baht
Current tax	-	-
Deferred income tax	10,838	1,819
Total income tax expense	10,838	1,819

The tax on the Company's loss before tax differs from the theoretical amount that would arise using the basic tax rate of the home country of the Company as follows:

	2021 Baht	2020 Baht
Loss before tax	(27,003)	(19,937)
Tax calculated at a tax rate of 20% (2020: 20%)	(5,401)	(3,987)
Tax effect:		
Expenses not deductible for tax purpose	812	1,762
Expenses that are deductible at a greater amount	(3,024)	(18,046)
Tax losses for which no deferred income tax asset was recognised	8,006	22,844
Reversal of previously recognised deferred tax	10,445	(754)
Tax charge	10,838	1,819

22 Basic loss per share

Basic loss per share for the years ended 31 December are calculated by dividing the loss attribute to shareholders of the Company by number of issued ordinary shares during the year.

	2021	2020
Net loss for the year (Thousand Baht)	(37,841)	(21,756)
Number of issued ordinary shares (shares)	1,200,000	1,200,000
Basis loss per share (Baht per share)	(0.032)	(0.018)

There are no potential dilutive ordinary shares in issue in 2021.

23 Related party transactions

a) Parent company

The Company is controlled by Salee Industry Public Company Limited which is incorporated in Thailand and owns 65% of the Company's ordinary shares.

b) Related party transactions

	For the year ended 31 December		
	2021 Thousand Baht	2020 Thousand Baht	Pricing policy
